2023 C2 Preliminary Examination Paper 2 "The value of Serendipity" Answer Key

Passage 1

1. In Paragraph 1, what distinction does the writer make between modern researchers and scientists like Newton and Archimedes? Use your own words as far as possible. [2]

Text	
Sir Isaac Newton, blessed by an	Unlike modern researchers who made discoveries in a
apple when formulating his laws of	systematic manner, the discoveries made were done in an
gravity, enjoys a reputation as one of	unstructured manner.
mankind's greatest minds but was	
one of the most difficult to work	Modern researchers prefer to work in partnership/together
with. In the same vein,	but scientists like Newton and Archimedes were not team

blunted the competitive	

4. In paragraph 3, how does our routine use of search engines substantiate the writer's belief that serendipity no longer plays any real part in our lives? *Use your own words as far as possible.* [2]

Text	
Thankfully, we have replaced	Utilising search engines,
unproductive chance with	a) we live efficiently/we can engage in labour saving activities [1]
purposeful design.Take for	
example our use of search engines	yet
where we can locate whatever we	
want in minutes. We do not want to	c) continue to have customised/ personalised events [1]
waste time trawling through the	
internet to discover what else we	
could be interested in, not when	
artificial intelligence allows us to	
delight in tailored experiences all of	
the time.	

5. Explain how lines 19-21 support the writer's assertion in the first sentence of paragraph 4. Use own words as far as possible. **[2]**

Text	
There are other reasons why a reliance on serendipitous encounters is no longer popular. Our desire for immediate gratification has dampened our willingness to engage in chance-taking in our relationships since digital tools enable us to acquire social circles with little effort	We no longer feel that serendipity has relevance as a) serendipity cannot satisfy our want for instant answers/ solutions [1] and b) technology has offered us the ability to make friends without much struggle/ work [1]

6. From paragraph 5, explain three criticisms the writer has of 'those who place their faith in serendipity' (line 26). Use your own words as far as possible **[3]**

Text	
Furthermore, those who place their	The writer criticises those who place their faith in serendipity
faith in serendipity are not as	as
cheery as they make themselves out	a) not as upbeat/ optimistic OR are gloomy/ pessimistic.
to be. Participants in a research	
project 'Do the Happy Go Lucky?'	She claims they

Syndrome' which promote the	
life-changing power of projecting	Any 3 points out of 4
positive thought, they also dodge	
stressful situations. They believe	
that with serendipity by their side,	
everything will turn out well. Yet,	
which major global problems have	
ever been solved so simplistically?	

7. Identify one way in which the final paragraph provides an effective ending to the writer's argument. [1]

iext	l Text	
------	--------	--

While there is something attractive about depending on serendipity, we would be exaggerating the merits of the *Eureka* moment and over-estimating the frequency of bungling discovery. Though the thought of being rewarded for unintentional discoveries is alluring, to leave life solely to serendipity is inadvisable in an ambiguous world.

The final paragraph refers back to the opening hook about the advantages/usefulness of that *Eureka* moment which helped us to solve problems/ make helpful discoveries quickly.

Passage 2

8. How does the writer support his assertion that 'serendipity is the provider of opportunities to achieve greatness' (line 1)? **[2]**

Text	
Billionaire Bill Gates might well	a) He cites the example of Bill Gates who was able to achieve
have led a very different life had	great success as
the Mother's Club in his primary	
school not furnished a rudimentary	b) he was just in the right place at the right time
processor or paid for expensive	OR
computer time using garage sale	c) he was fortunately/providentially given the means for success
proceeds before computers	
became commonplace. Gates was	
introduced to the micro-computer,	
wrote his first software program on	
that basic terminal and the rest, as	
they say, is history.	

9. According to the writer in lines 7-10, how does the Ovarian Lottery demonstrate that serendipity should not be underestimated? **Use your own words as far as possible [1]**

Text	
The disproportionate numbers of the world's wealthiest people comprising those born in affluent nations vis-à-vis developing ones, lend credence to the Ovarian Lottery, a concept financial wizard Warren Buffett alluded to when asked for his thoughts on success.	There is an unequal /uneven population of richer people begin their lives / are found in wealthier / more prosperous countries/states compared with less well-off ones. [1]

Summary Question

10. From paragraphs 3-5 only, summarise what the author offers as reasons for the decline in the belief in serendipity and what the negative consequences are. [8]

Write your summary in **no more than 120 words**, not counting the opening words which are printed below. **Use your own words as far as possible.**

Fewer people believe in serendipity as ...

Unfortunately, society appears intent on downplaying the value of serendipitous encounters.	the importance of serendipity has been disparaged/decried.
2) Instead, diligence has taken centre-stage.	Our focus is on being industrious/ assiduousness.

3)The loss of enthusiasm for serendipity is fuelled by the perception that not only is it at odds with problem-solving	Serendipity is antagonistic to/ conflicts rational/ logical thinking,
4) but it also weakens our ability to use time well	deemed inefficient/unproductive,
5) and contradicts the commonly held belief that we are directors of our own destinies .	which subverts/ challenges the idea that we are in control
6) we have lost our appetite for serendipitous discovery which once powered profitable pursuits	We lose the drive to generate meaningful/ valuable endeavours
7) and alleviated monotony in our lives.	and fills us with dreariness/tedium.
8) Modern society's rejection of serendipity is unfortunate as our preference for the predictable	Our favouring of/ fancy for the conventional/ expected
9) is crippling our abilities to cope in a shifting world.	hinders/ handicaps how we handle/ manage ambiguity
10) Fearing the limiting effects of remote work, executive officers demand their employees return to the office as they seek to regain the advantages that serendipity once provided. Remote work might have increased business efficiency, but	and we lose our edge/ upper hand
11) random encounters have become rare	With much reduced/ infrequent spontaneous/ unplanned meetings at work,
12) necessary to ignite ingenuity in formulating ideas	to generate/ inspire innovative/ creative concepts
13) and resolving problems at the water-cooler or photocopier	and develop solutions/ answers,
14) With the reduction of successfully engineered workplace encounters, corporations will no longer reap the award-winning fruits of serendipitous engagement.	which has stopped/ halted the development of iconic/ outstanding products and services.
15) In addition, for those who turn their noses up at serendipity, their loathing for themselves increases when they stumble	Their self-contempt/ self-blame intensifies/ deepens
16)[athletes] who deny serendipity are unable to accept setbacks in competitions as temporary lapses.	and they see failures as permanent/ perpetual
17) By not believing in the magic of serendipity and expecting only bad things to happen ,.	Beset by a pessimistic/ glum outlook towards life,
18) they squander the opportunity for personal development	we waste/misuse the chance to improve/ progress,
19)the possibility of transformation	for radical change/ reformation

20) that can help them achieve their aspirations	and realise their goals/ dreams.
